

Key Points - EnviroReady™ Roofing System

- This Firestone-exclusive system allows a building owner to install a high-quality roof today and defer expensive green costs to a later date
 - Due to today's economy, the funds for capital investments are not as prevalent. However, the building owner may still need a roof
 - By installing the EnviroReady Roofing System they have a proven 20-, 25-, or 30- year system that can be upgraded when incentives are more lucrative or funds become available
- Allows the installation of photovoltaic (PV) or garden roof systems within the next 7 years, without a warranty disruption
- Warranty offers a free inspection prior to installation to ensure the roofing system will perform as intended
- Warranty offers a free post-installation inspection to ensure no incidental damage occurred that could harm the waterproofing system
- System utilizes new ISOGARD™ HD board as a cover board to protect the roof from high foot traffic associated with PV and garden roof systems
- System utilizes Firestone's Premium System membranes, using fully adhered EPDM or TPO only.
- Installing a fully adhered TPO Roof with PV or Garden can help satisfy LEED credits
- .03 per sq. ft. up-charge on the warranty

TPO System with PV

EPDM System with Garden

Warranted for Today.....Warranted for Tomorrow
